

# Nikhil VS

AI-Focused Full Stack Developer · nikhil@example.com · github.com/nikhilvs · linkedin.com/in/nikhilvs

## SUMMARY

---

Student developer building practical AI-powered web applications. Comfortable across Flask backends, React frontends, REST APIs, and LLM workflows (RAG, embeddings, retrieval). Enjoy shipping end-to-end projects with clean architecture and recruiter-ready polish.

## EDUCATION

---

**B.Tech in Computer Science** — XYZ Institute of Technology (2022 – 2026)

Relevant coursework: Data Structures, DBMS, Operating Systems, Machine Learning, Web Engineering.

## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, TypeScript, SQL

**Frontend:** React, Tailwind CSS, Vite, HTML/CSS

**Backend:** Flask, REST APIs, JWT auth, SQLAlchemy

**Databases:** PostgreSQL, SQLite, Redis, ChromaDB

**AI / ML:** OpenAI API, LangChain, RAG pipelines, embeddings, prompt design

**Tools:** Git, GitHub, Docker (basics), Postman, Linux

## HIGHLIGHTED PROJECTS

---

**GeetAI** — AI mental wellness companion grounded in Bhagavad Gita teachings.

Flask + SQLAlchemy backend with JWT auth; React frontend with mood logging; OpenAI for contextual verse-based responses; SQLite for user history.

**DocuQuery** — RAG-based document Q&A system.

Flask service handles semantic chunking and OpenAI embeddings; ChromaDB for vector search; React UI returns answers with cited source pages.

**DevDash** — Developer analytics dashboard.

Flask backend integrates GitHub API with Redis caching for rate limits; React + Chart.js renders contributions, languages, and activity timelines.

## HACKATHONS & ACHIEVEMENTS

---

- Finalist — College AI Hackathon, 2024 (shipped a working RAG demo in 24 hours).
- Top 10 — Inter-college Full Stack Build Sprint, 2024.
- Active open-source contributor: small PRs to Flask ecosystem and LangChain docs.
- Regular participant in weekend hackathons focused on AI tooling and developer experience.
